

# Spare parts

## High-quality & Reliable

KBA original parts undergo comprehensive product and quality assurance testing before being integrated into our product line, since only in this way can we guarantee the optimum performance and reliability you require in connection with our printing presses.

The continual further development of our original parts to the latest technical standards and machining with the highest technological precision ensure a maximum

durability of the parts and thus also maximum printing press availability for our KBA customers.

Parts availability? With our high parts availability of over 2.5 million original parts in stock, we can ensure that you are provided with the fastest delivery at all times, and this for emergencies 24 hours a day, seven days a week. Our specialists are thus always at your service for efficient consultation.

To minimize the time you spend for quick, simple and reliable locating of parts, a new interactive spare parts catalogue is now available to you. This catalogue is especially created for your printing press and is always available to you online and up-to-date with an integrated shopping basket function.

### Your benefits:

- Very high parts availability
- Deliveries within 24 hours
- Maximum availability of your machine
- Checked and with highest technological precision produced parts
- Long lifetime of parts
- Especially optimized spare parts for your press
